#### New York, NY - New Supported Scaffold Law, Goes Into Effect

New York, NY - A new supported scaffold law, goes into effect on November 19, 2006.

To ensure safe and compliant construction throughout all five boroughs, all supported scaffolds 40 feet or higher will require a permit.

In addition, Local Law 52 of 2005 requires individuals who use, erect, maintain, dismantle, repair or modify a supported scaffold to be certified by completing a training program (approved by the Department of Buildings) in scaffold safety.
